

These instructions are written up using the Chrome browser. Using a different browser to login to secure.colostate.edu may produce slightly different results.

1. Login to secure.colostate.edu
2. Click on "Start" next to Pulse Secure

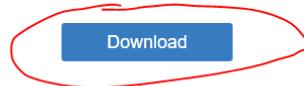

3. You'll see a message about searching for the application launcher. Click on "Download"

Searching for the application launcher...

If you know that the application launcher is not installed, skip the wait and download now

If you do not want to proceed, please click [here](#) to go back.

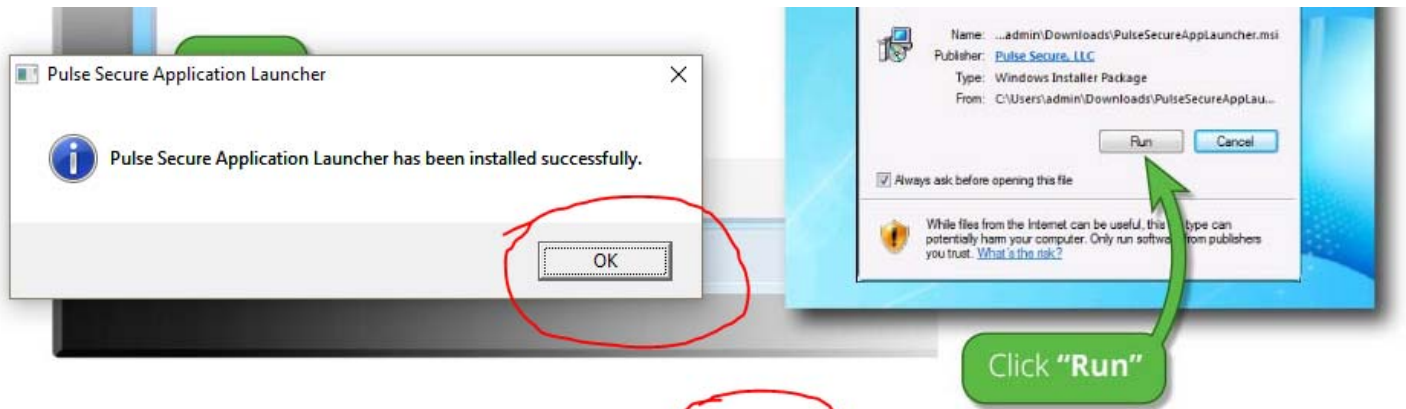

4. Click on the downloaded file to install it

Once you have completed the above steps, click [HERE](#) to continue with the Pulse Secure launch. We recommend selecting "remember" and "always" during the installation process.

5. You'll get a message that application launcher installed. Click on "OK" Then click on the link on the word "Here" on the web page.

Once you have completed the above steps, click [HERE](#) to continue with the Pulse Secure launch. We recommend selecting "remember" and "always" during the installation process.

Once the Pulse Secure application is installed and started it will appear in your system tray.

6. This will start the application install. You'll likely be prompted several times to allow installation of various pieces. Just agree each time. Once it gets through that process it is installed and you can login to Pulse Secure.
